## OBJECTIVES

### Software Engineer

Software engineers are the creative minds behind computer programs. Some develop the applications that allow people to do specific tasks on a computer or another device. Others develop the underlying systems that run the devices or that control networks.

### Lawyer

Represent clients in criminal and civil litigation and other legal proceedings, draw up legal documents, or manage or advise clients on legal transactions. May specialize in a single area or may practice broadly in many areas of law.

### Computer Programmer

Computer programmers typically do the following: Write programs in a variety of computer languages, such as C++ and Java. They also Debug programs by testing for and fixing errors. They may also build and use computer-assisted software engineering (CASE) tools to automate the writing of some code.
